other skills carpentry

ADDITIONAL INFORMATION

- Projects**
- I have built campus chat website based on campus student readiness because example on my campus many students can't each other ther is not enough internet and network. From that I think to solve the problem so I built internal server and network and built campus chat to discuss questions and answers and also to know any notice about the campus and useful information. My project the best because to use no need internet just connect to internal server. I used languages html, css,javascript, php, mysql,SQL,jquery, bootstrap,
 - I built online selling retail system software using vb,SQL and other. On this project to make easy to buy and sell on shops, supermarkets , retailers. Many people specifically shopkeeper is challenging when many peoples are came so to solve this problems I built this software with two ways first simply using name of product and the second way is by using scan barcode.
 - I have built quizapp with flutter and integrate with HEROKU(API). i am using flutter and dart and some back end codes to integrate api. the main purpose I want to built this app is to know some basic question about programming language.
 - i have some work mobile and desktop app design on UI/UX design using figma
 - Some other projects on progress
